1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Charles Thomas on April 14, 2005.

The application has been amended as follows:

In claim 1, line 1, "the steering tube" has been changed to –a steering tube- and "the handlebar" has been changed to –a handlebar-. In line 27, "secured" has been changed to –steering-.

In claim 2, line 28, "first wedges" has been changed to –first wedge-.

In claim 7, line 2, "both" has been deleted.

2. The following is an examiner's statement of reasons for allowance: The prior art to Cheng shows a clamp for connecting a steering tube to a handlebar that includes a steering tube rest 34 with opposing surfaces, one surface having a curvature 34 to accommodate a steering tube and sloping surfaces 320 that contact first and second press blocks 28-31 to hold the steering tube in the clamp. Cheng, however, fails to teach using the press block to pressing against a handlebar rest to hold the handlebar in the clamp. Hoppes shows a pair of press blocks (Figures 8 and 13) that clamp opposing frame members in place. However, it fails to teach steering and handlebar rests.
